

RNG CERTIFICATION

Certified Fair Gambling www.certifiedfairgambling.com

January – December, 2018

World Poker Club group

<https://www.facebook.com/games/worldpokerclub>

The World Poker Club group has presented their Random Number Generator (RNG) to Certified Fair Gambling, for analysis purposes. This included both the source code of the RNG itself and relevant source code for when the RNG was used to generate cards for the poker deck.

An exhaustive series of tests was conducted in two parts; first, the RNG's raw output itself was subjected to the industry-standard Diehard test suite; next, the cards generated by the poker code, driven by the RNG, were subjected to a series of variance tests to determine how often certain common memorable occurrences take place.

The results of both series of tests indicate that the poker deck driven by the World Poker Club group's RNG generates an experience that matches the experiences one would get with a thoroughly shuffled deck of real-life cards, with distributions that fit the theoretical expectations of the tested random events.

As such, CFG presents the following certification for the World Poker Club group, in recognition of their dedication to providing a fair and random gambling experience to all players, for the calendar year of 2018.

The following apps and social media portals use this RNG, and should be considered covered by this certificate:

World Poker Club	(iOS / Android)
Poker game: World Poker Club	(iOS / Android – RU only)
Poker Blitz: Hold'em Poker	(iOS / Android)
Viber World Poker Club	(iOS / Android)
World Poker Club	(Facebook, Vkontakte, Odonklassniki, MyWorld)

The latest information on this certification can be found at: <https://certifiedfairgambling.com/clients/>
